EXPERIENCE

Software Engineer

June 2024 – Present

ARITS Limited

Baridhara DOHS, Dhaka

Spearheaded the development of sophisticated, responsive user interfaces, integrating advanced features like real-time data synchronization, global state management, and multi-factor authentication. Collaborated with backend developers, planning and building system architecture. Implementing Tanstack Query for seamless database interactions, leading to improved data consistency and query performance. Integrated Stripe payment gateway into various projects. Implemented notification and messaging services on the frontend. Helped developing microservices for modular architecture, applying encryption techniques for secure data transactions. Streamlined deployment workflows by containerizing applications with Docker, achieving a 50% reduction in deployment time.

Junior Software Engineer

Sept 2022 – June 2024

ARITS Limited

Baridhara DOHS, Dhaka

Designed over a dozen of complex and responsive UIs, implementing advanced features like global state management and authentication systems. Built multiple Frontend reusable components using Next.js, applied cryptography for data security. Containerized applications with Docker, enhancing full-stack development capabilities for over 40% of deployments.

Internship Trainee

June 2022 - Sept 2022

ARITS Limited

Baridhara DOHS, Dhaka

Developed web applications with Next.js, emphasizing server-side rendering and crafting engaging user interfaces using versatile animation libraries. Gained hands-on experience in building and integrating RESTful API endpoints while managing data fetching and state with modern front-end libraries. Additionally, developed backend services and REST APIs using Laravel, integrating Elasticsearch for optimized data querying and retrieval.

TECHNICAL SKILLS

Languages: Javascript, Typescript, PHP, Python, Java, C, C++, C#, HTML, CSS

Databases: MySQL, PostgreSQL, MongoDB, Elasticsearch, GraphQL

Framework & Library: Laravel, NextJS, ReactJS, Tailwindcss, ShadCN, Django, NestJS, NodeJS

Technologies: JIRA, Git, Docker, AWS, CI/CD, Turborepo, Headless Wordpress, Zustand, Redux, Context API, TanStack Query, Puppeteer, Electron

PROJECTS

HumR (In-house Product) | Next.js 16 | Typescript | Cryptography | Tanstack | Tailwindcss | ShadCN | TurboRepo June 2024 – Present

- **Frontend Development:** Architected and developed the frontend codebase for HumR, a multi-company HR platform spanning three Next.js applications, implementing best practices for scalable and maintainable code structure.
- **Single Sign-On (SSO):** Designed a secure login flow with middleware to share encrypted cookies across subdomains, enabling seamless user authentication across multiple modules without repeated logins, redirecting invalid users to the main module's login page.
- **Optimized Codebase with Turborepo:** Utilized Turborepo to create and publish shared packages for common functions, reducing code duplication and enhancing maintainability across the project.
- **API Integration:** Spearheaded API consumption using TanStack Query, ensuring efficient data fetching and state management across the application.
- **Enhanced Security:** Implemented cookie encryption to secure user data and maintain session integrity across subdomains.

- **Developed Custom Components:** Built reusable and dynamic UI components, including a Dynamic Form Builder, Weekly Routine Builder, Custom Calendar Routine, Attendance Clock In-Out, and Attendance Report UI, improving user experience and functionality.

Oporajita | Fullstack | *Next.js* | *Typescript* | *Elasticsearch* | *Docker* | *Tanstack* | *Service-Oriented Architecture* 2025

- **Programme Dashboard:** Built a real-time data and collaboration dashboard for The Asia Foundation's Oporajita initiative, used by 15 partner organisations across Bangladesh's garment sector; delivered in an 8-week cycle from UX design to deployment.
- **Data Standardisation:** Replaced fifteen incompatible spreadsheet conventions with a single submission schema, making cross-partner comparison a property of the system rather than a manual reconciliation pass.
- **Reporting & Collaboration:** Delivered a report builder for donors and project teams, a collaboration tracker surfacing joint activities, and a historical archive keeping every submission reviewable.

Bullwip | Fullstack | *Next.js 16* | *Typescript* | *Docker* | *Shadcn* | *Tailwindcss* | *Laravel* | *PostgreSQL* | *Elasticsearch* Present

- **Fullstack Development:** Architected a full-stack rental onboarding platform using Next.js for a responsive frontend and Laravel for a robust backend API, specifically tailored to the UK housing market.
- **Resumable Onboarding:** Modelled the multi-party onboarding flow as durable server-side state so landlords, agents, and tenants resume mid-application days later instead of restarting.
- **Search at Scale:** Backed property and applicant search with Elasticsearch where relational queries had stopped feeling interactive.

Datafast | Fullstack | *Laravel* | *MySQL* | *Electron* | *Next.js 14* | *Typescript* | *Puppeteer* | *Docker* Present

- **Data Normalization:** Enhanced data handling and performance with effective frontend normalization techniques.
- **Automation:** Integrated seamless web automation using Puppeteer for efficient browser-based task execution
- **Infrastructure:** Designed and developed the entire system from scratch, wrapping the application with Electron for seamless desktop deployment.

calternatives.org | Fullstack | *Headless Wordpress* | *GraphQL* | *ACF* | *SEO* | *Next.js 14* | *Typescript* | *Docker* | *SSG* | *SSR* Jan 2025

- **Headless WordPress Integration:** Integrated WordPress with GraphQL and ACF for flexible content management and efficient data retrieval, resulting in a 70% increase in development speed
- **Technical SEO:** Applied sitemap, robots configuration and technical SEO best practices to boost visibility and search engine performance by 65%

arits.tech | Fullstack | *Headless Wordpress* | *GraphQL* | *ACF* | *SEO* | *Webflow* | *Javascript* | *Docker* Feb 2024

- **Data Normalization:** Improved data management and performance by 30% through frontend data normalization.
- **Headless WordPress Integration:** Integrated WordPress with GraphQL and ACF for flexible content management and efficient data retrieval, resulting in a 40% increase in development speed
- **Technical SEO:** Applied sitemap, robots configuration and technical SEO best practices to boost visibility and search engine performance by 45%

CERTIFICATIONS

Responsive Web Development, CodersTrust Dhaka, Bangladesh
Mar 2020

EDUCATION

Computer Science and Engineering, American International University-Bangladesh Dhaka, Bangladesh
Bachelor of Science – 3.58/4 Jan 2018 – April 2022
Thesis: Machine Learning: Train AI to detect sentiment in a sentence
